Author Contributions

The manuscript was written through contributions of all authors. All authors have given approval to the final version of the manuscript. M. Y., H. Q., L.X., and W. L. performed the experiments; M. Y. and H. Q. performed the data analysis. L. M., R. F. I., and F. S. contributed to generating the concept of serial dilution SlipChip and its application to digital quantification. M. Y., X. C., W. Y. and M. L. contributed to the HBV clinical study. M. Y. and F. S. wrote the manuscript.
